Let's Start!

Everything in the film looked so real!

Learning Outcome

Exchange information about unlikely events or fairly certain conditions that will be fulfilled in present, past or future in spoken or written texts and in work and social contexts.

Can Do Statements

- I can talk about art, science, exploration, beliefs and opinions.
- I can express possible but unlikely conditions.
- I can talk about two actions together.

Ask your partner:

- What was the last film you saw that used special effects?
- Can you imagine the film without them? Why or why not?

Let's Explore!

I enjoy **FX*** movies!

* "FX" refers to any type of special effects.

Instructions: Read the text aloud.

Should you see a blockbuster movie this weekend, expect it to have special effects. If by any chance it is a sequel, you'd better expect twice as many. If you should agree that FX movies are for you, then you would know that they abound these days. Trifling little affairs of the heart on film, without movie magic seem dull to many. I've noticed more and more people doze off in the artier films these days.

Today, when people go to the movies, they want to be impressed. One way to impress moviegoers is by letting them have their fill of special effects. Special effects make the unbelievable seem believable. Dinosaurs live again, spaceships battle to save the planet, and whole cities disappear in the blink of an eye – all thanks to special effects. Should you want more after the first thrilling adventure, a sequel would prove to be just the thing to entice you the second time around.

Special effects have been part of moviemaking almost from the start. If by any chance you look up how they were done you'd find they were originally called "tricks" because some ideas had actually been stolen from stage magicians. Watching FX scenes play, you often notice stop motion and forced perspective effects. These are among the oldest. In today's special effects, you see artists use new methods developed with modern technology. For example, green screens let moviemakers shoot completely separate scenes and then combine them into one. Should a director want even more control, his computer would allow him to edit scenes until they are perfect. So whether we're watching spaceships explode, giant bugs invade from outer space, or cool morphing robots, special effects will always make going to the movies a more exciting and magical experience.

Let's Practice!

Special effects bring movies to life.

Instructions: Organize the mystery sentence. Practice saying the sentences aloud. Check your pronunciation with your instructor.

1. noticed / people / and / I've / more / films. / doze / off / in / the / more / artier
2. to / impress / fill / of / is / by / One / way / letting / them / have / effects. / their / special / moviegoers
3. let / separate / Green / screens / completely / scenes. / moviemakers / shoot
4. use / new / artists / In / today's / you / see / special / effects / methods.
5. Special / believable. / make / the / effects / unbelievable / seem /

Let's Practice!

It's possible but unlikely ...

Instructions: Use the phrases from the word bank to complete the sentences.

Should you want more / Should you see / If you should agree / If by any chance / If by any chance it

1. _____ a blockbuster movie this weekend, expect it to have special effects.
2. _____ is a sequel, you'd better expect twice as many.
3. _____ that FX movies are for you, then you would know that they abound these days.
4. _____ after the first thrilling adventure, a sequel would prove to be just the thing to entice you the second time around.
5. _____ you look up how they were done you'd find they were originally called "tricks" because some ideas had actually been stolen from stage magicians.

Extension Activity

Watch a TV show episode or movie that uses special effects.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Watch an episode or film and make a list of the effects used in the film or TV show.
- Explain how these enhanced the viewing of the episode or film.
- Explain how you think the impact would have been greater or lessened by the removal of the effects.
- Discuss your observations and ideas with a partner or group.
- Discuss whether you think we are becoming jaded by effects in our viewing and what that will mean to the future of filmmaking.

Self-Assessment

Yes

No

I watch an episode or film with special effects.

☐ ☐

I explain how I think the impact would have been greater or lessened by the removal of the effects.

☐ ☐

I discuss my observations and ideas.

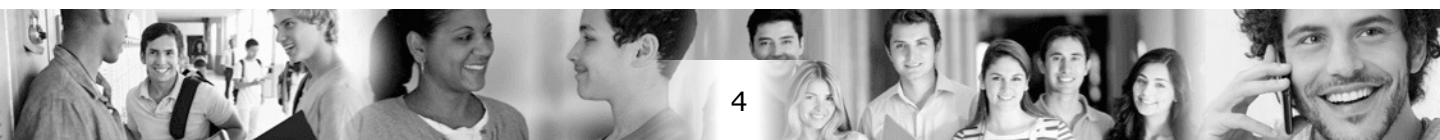

☐ ☐

We decide what FX films will mean to filmmaking in the future.

☐ ☐

Target Words

- **blockbuster** (noun): a very successful book or movie
e.g. Should you see a blockbuster movie this weekend, expect it to have special effects.
- **trifling** (adjective): small or unimportant
e.g. Trifling little affairs of the heart on film, without movie magic seem dull to many.
- **to doze off** (verb): to start falling asleep
e.g. I've noticed more and more people doze off in the artier films these days.
- **to have your fill** (expression): to experience as much as you want
e.g. One way to impress moviegoers is by letting them have their fill of special effects.
- **in the blink of an eye** (expression): extremely quickly
e.g. Dinosaurs live again, spaceships battle to save the planet, and whole cities disappear in the blink of an eye – all thanks to special effects.
- **green screen** (noun): a green monochrome backdrop used to project images on later for filmmaking
e.g. For example, green screens let moviemakers shoot completely separate scenes and then combine them into one.
- **to edit** (verb): to cut a movie the way you want it
e.g. Should a director want even more control, his computer would allow him to edit scenes until they are perfect.

Learning Points

Should in If-Clauses

You can use *should* in if-clauses instead of a Present or Unreal Past to talk about a hypothetical situation in a conditional clause. The condition is possible but unlikely.

You use *should* in an if-clause to suggest that a condition is possible but unlikely.

Structure:

If + should + verb ... , would/will + verb

Example:

If you should agree that FX movies are for you, then you would know that they abound these days.

This structure has the same meaning as *If by any chance*.

You can also omit *if* in certain contexts and start the sentence with *should*. It is usually quite formal.

Examples:

- *Should you see a blockbuster movie this weekend, expect it to have special effects.*
- *Should you want more after the first thrilling adventure, a sequel would prove to be just the thing to entice you the second time around.*
- *Should a director want even more control, his computer would allow him to edit scenes until they are perfect.*

Learning Points

Verbs with -ing and Bare Infinitives

When you talk about two actions linked together, you normally use two verbs. The first verb follows the rules of conjugation for the sentence, while the second verb can be a verb in the -ing form or a bare infinitive.

Verbs connected with observation like *see*, *notice*, *feel*, *hear*, *watch* can be followed by either an -ing form or a bare infinitive.

Example:

I've noticed more people dozing/doze off at the cinema these days.

You normally use the -ing form when you suggest that an action is in progress, while the bare infinitive suggests that the action is completed.

Look at the following examples from the text:

Examples:

- *I've noticed more and more people doze off in the artier films these days.*
- *Special effects make the unbelievable seem believable.*
- *Watching FX scenes play, you often notice stop motion and forced perspective effects.*
- *In today's special effects you see artists use new methods developed with modern technology.*
- *For example, green screens let moviemakers shoot completely separate scenes and then combine them into one.*
